POWERING PROGRESS WITH PRECISION AND EXPERTISE

K/R

ENERGOTECH EXPERTS

COMPANY OVERVIEW

K&R ENERGOTECH EXPERTS

K&R ENERGOTECH EXPERTS is a specialized company in the energy sector, providing professional supervision of installation and commissioning of power and distribution transformers, site managing and everything related to High Voltage.

With a commitment to excellence, safety, and delivery in all conditions, the company ensures reliable energy solutions that meet the highest industry standards.

ENERGOTECH EXPERTS

Vision

To be a trusted leader in transformer installation and commissioning services, driving sustainable energy infrastructure and technological advancement across global markets.

Mission

To deliver superior technical expertise and project management in every installation, ensuring efficiency, reliability, and long-term performance for clients in the power and distribution sector.

Core Values

INTEGRITY Upholding transparency and professionalism in every project.

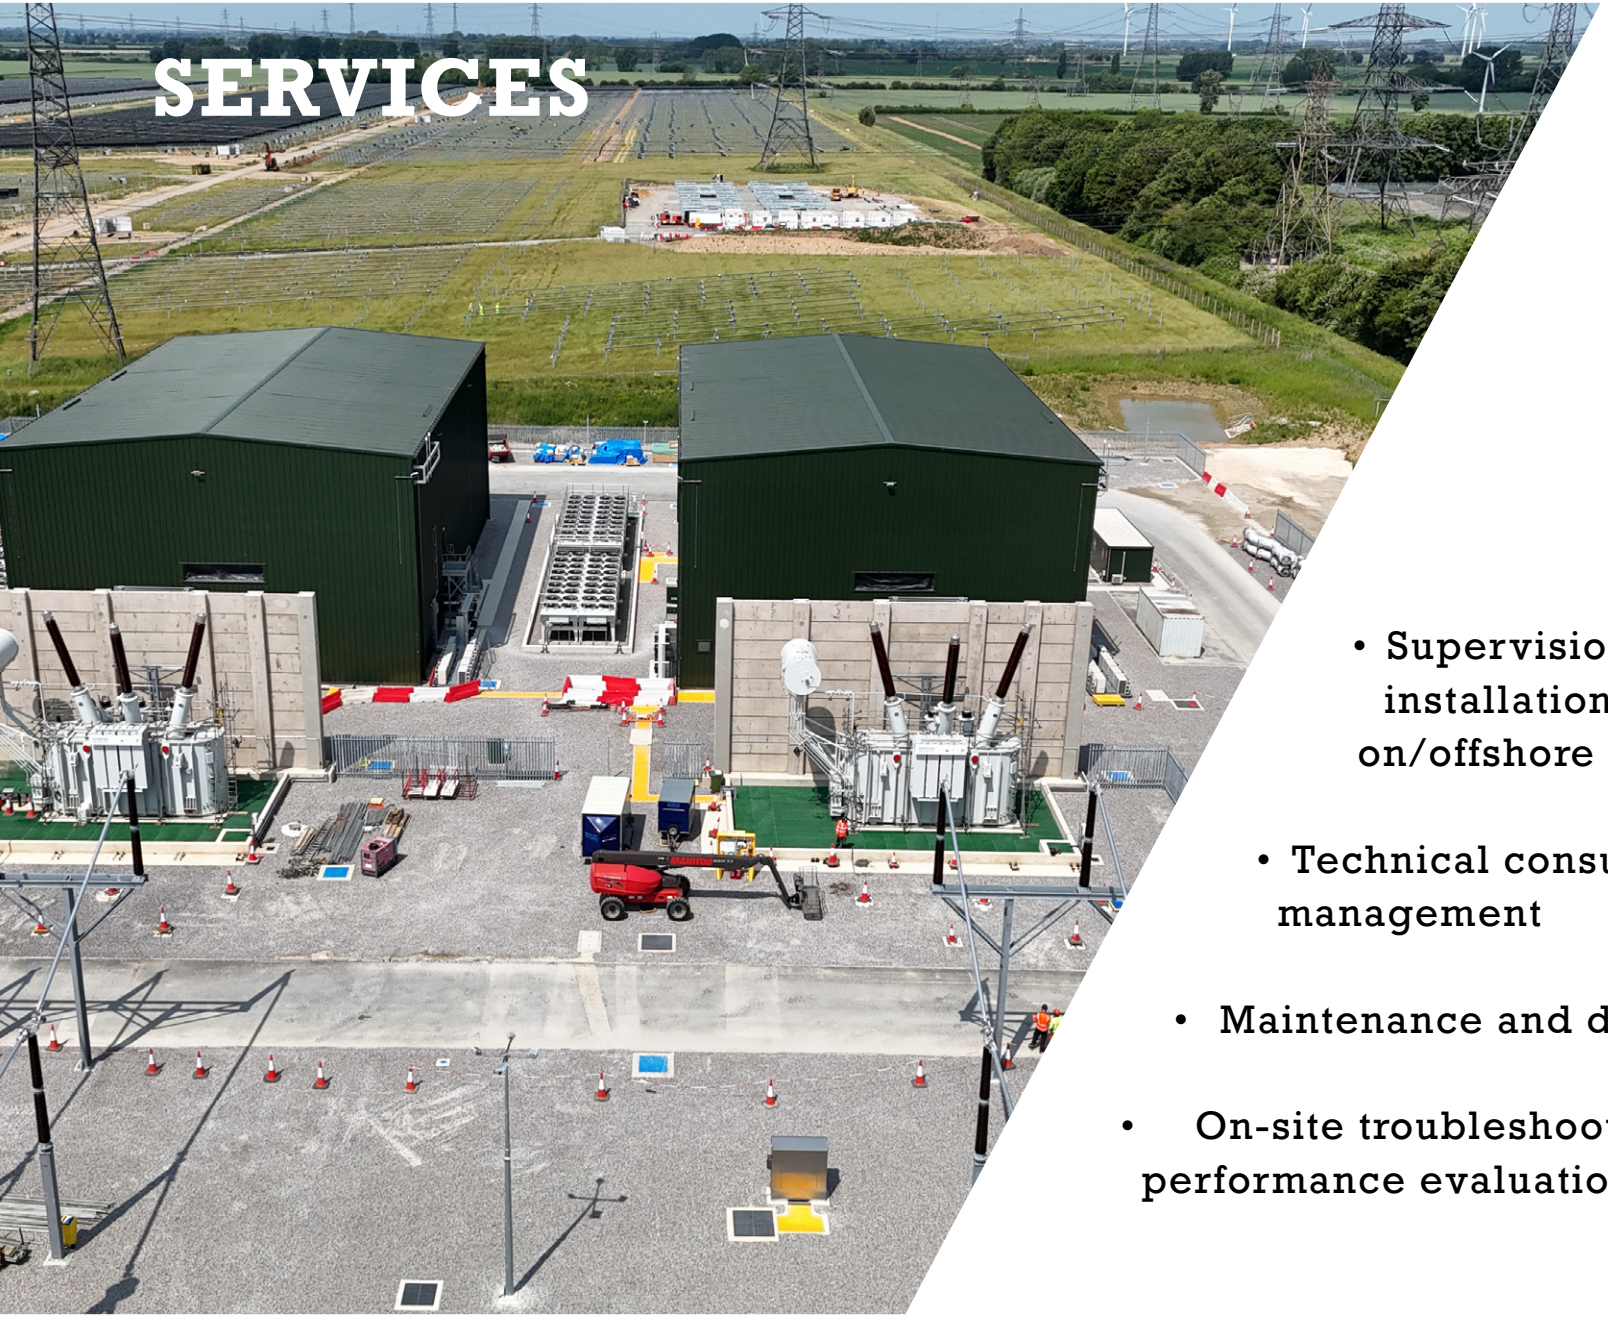
QUALITY Ensuring precision and compliance with international standards.

SAFETY Prioritizing the well-being of personnel and the environment.

INNOVATION Continuously improving methods and adopting advanced technologies.

PARTNERSHIP Building long-term relationships based on trust and performance.

SERVICES



- Supervision of power transformer installation and commisioning on/offshore
- Technical consulting and project management
- Maintenance and diagnostic testing
- On-site troubleshooting and performance evaluation

Goals

Strengthen partnerships with global transformer manufacturers.

Implement our worldwide experience in installation on site.

Promote sustainable and energy-efficient solutions in all operations.

Maintain a zero-incident safety record across all project sites.

REFERENCES

- High skilled techinicans with high sense of responsibility no matter the challenge nor the conditions
- Numerous certificates for offshore and onshore HV installation team leadership
- On site supervision of installation of power transformers world wide: Europe, Middle East, Asia, Africa
- Technical support for renewable energy integration projects
- Collaboration with leading transformer manufacturers and EPC contractors. Control cabinets manufacturing and switchgears
- Installation of all HV equipment-power, distribution, industry, oil and gas

SELECTED PROJECTS AND COLLABORATIONS

- Our early projects reach back in 2013 where we were part of erection team Helb for substations in Kurdistan New AIS 132/33/11 kV
- Siemens Energy Mega Project in Egypt 2018 Combined-Cycle natural gas power plants
- Numerous offshore farms: Seagreen, Inch Cape, Baltic Eagle, Tennet, West Virgina Dominion, etc.
- Grid transformers for EU: Tennet, Energinet, Čeps, UK National Grid, Scottish Power
- Grid transformers for: Meralco Phillipines, UAE Dewa/ Sewa, Egypt, Qatar
- Numerous services and re-constructions of substations in EU, Africa and Middle East
